

WRNW Waste Management Facility – Official Release

WRNW Waste Management Facility is pleased to announce the recent purchase of a used scale as part of our continued commitment to improving operations and aligning with sustainable industry standards.

Even with this significant investment, we are proud to confirm that there has been no increase in partner contributions from our two municipal partners — the RM of Reynolds and the RM of Whitemouth — as well as North Whiteshell Provincial Park, in the 2025 and 2026 budgets. This responsible financial approach reflects our commitment to maintaining affordability while still advancing essential infrastructure. As a result, this project will be implemented progressively rather than immediately. This purchase reflects that we have listened carefully to our residents, who have expressed the importance of having an on-site scale.

The addition of this equipment will help ensure greater accuracy in user fees, as well as improve the precision of our recorded and mandatory volume reporting required annually by government and regulatory bodies.

The scale was acquired at a cost of \$65,000, and while this is an important step forward, it will take time before we are financially able to complete the necessary site modifications and infrastructure required to make the scale fully operational.

We are expecting delivery of the scale in the coming weeks, depending on weather conditions and Mother Nature cooperating. We want to assure all residents and partners that every effort will be made to avoid disruption to normal operations throughout the progression of this project.

WRNW Waste Management Facility would like to sincerely thank all residents for their continued patience and support as we move forward with this exciting endeavor. We remain committed to transparency and will continue to provide updates as progress is made. Together, we are building a more accurate, efficient, and sustainable future for waste management in our region.
